

# Continuous Code Reviews

## A Social Coding tool for Code Reviews inside the IDE

### Problem

- ▶ **No continuous feedback on code quality**  
Avoid mistakes while implementing a pattern.
- ▶ **No support for questions of new developers concerning existing code**  
Avoid mistakes while implementing a pattern.
- ▶ **Forces the developers to leave their IDE for commenting on code**  
Avoid mistakes while implementing a pattern.

### Solution

Tool for continuously adding comments in the IDE

- ▶ **Add comments to all meta objects**  
Packages, classes, methods, method snippets.
- ▶ **State-based in stead of change-based**  
Comments refere to the whole code of a state of the system
- ▶ **Stuff**  
stuff
